DATA ENGINEER

with background in Statistics, Data Science and Economics

giacomorabuzzi@gmail.com 

Verona, Italy (willing to relocate) 

WORK EXPERIENCE

- 10/2025 | ongoing
- Data Engineer - Analyst** | SDG Consulting
 - Development and maintenance of backend data pipelines for data processing and transformation using the Azure ecosystem (Data Factory, Databricks, Storage, SQL).
 - Design and implementation of data transformation models using dbt, with a focus on modularity and analytics engineering best practices.
- 02/2023 | 05/2023
- Research Intern** | Università degli studi Milano Bicocca (Research Services)
 - Analysis of the drivers of labor force participation rates in Europe from 1980 to 2019.
 - Data collection and creation of the dataset suitable for analysis.
 - Application of panel data econometrics techniques and economic interpretation.

EDUCATION

- 09/2023 | 01/2026
- Master's Degree in Statistical and Economic Sciences** | Università Milano - Bicocca
 - Statistics and Data Science Path; Final evaluation: 110/110 cum laude.
 - Excellence awarded department.
 - Core Courses: Economics Statistics, Bayesian Statistics, Machine Learning, Spatial Statistics, Computational Statistics, Advanced Probability.
- 09/2024 | 07/2025
- Erasmus + Programme** | Technische Universität Wien
 - Master's programme Statistics – Probability – Mathematics in Economics.
 - Core Courses: Nonparametric Methods, Data Acquisition and Survey Methods, Advanced Methods for Regression and Classification, Visual Data Science.
- 09/2020 | 07/2023
- Bachelor's Degree in Statistical and Economic Sciences** | Università Milano - Bicocca
 - Insurance and Finance Path; Final evaluation: 110/110 cum laude.
 - Excellence awarded department; Scholarship for academic merits.
 - Core Courses: Statistics, Probability, Probability, Linear Algebra, Econometrics, Databases, Economic Time Series Analysis, Data Mining.

SKILLS

- Azure** | Advanced
- dbt** | Advanced
- R** | Advanced
- SQL** | Advanced
- Excel** | Intermediate
- Latex** | Intermediate
- Python** | Intermediate
- Power BI** | Basic
- SAS** | Basic
- Stata** | Basic

PROJECTS

- Drought prediction using weather data**

Applied regression, classification, and machine learning models to weather and drought datasets to evaluate the potential of automated methods to support or replace expert interpretation in drought monitoring and analysis.
- Presence monitoring to reduce energy waste**

Applied machine learning techniques (including clustering and Neural Networks) to CO₂, temperature, and lighting data to detect occupancy and improve indoor energy efficiency.

CERTIFICATIONS

- 2025 **dbt Fundamentals** | dbt Labs
- 2025 **Data Warehousing Workshop** | Snowflake
- 2025 **Advanced R** | DataCamp
- 2024 **Basics of AI Python Coding** | DeepLearning.AI

LANGUAGES

- Italian** | Native
- English** | Advanced (IELTS C1 - 8)
- Spanish** | Intermediate (B1)
- German** | Basic (Innes German Course - A1)

INTERESTS

- Basketball
- Football
- Reading
- Travelling
- Videogames
